

TLK 25 Precise indoor location

TLK 25 is a wearable WAVE PTX device that expands beyond push-to-talk communication with a dedicated emergency button that helps you streamline responses. Take emergency management one step further and integrate TLK 25 with Location Tech to gain precise indoor location capabilities. When a user presses the device's emergency button, Location Tech will automatically share their exact location with selected personnel.

Features of the Location Tech integration

Precise indoor location

Identify the location of an emergency with room-level location tracking.

Mass notification

Quickly notify all users of emergencies with SMS and email alerts.

Optional mapping

View maps of your site and plan emergency workflows.

Streamline panic responses

→ Trigger

Employee encounters an emergency situation and triggers their emergency button.

→ Scan

Device scans for nearby Bluetooth beacons and sends location information back to the identification server.

→ Notify and report

Mass notification is sent via SMS and email. The dashboard map highlights the room or location where the alert is coming from.

Protect your people

Hospitality

Use precise indoor location in hotel rooms to enable panic workflows for isolated roles like housekeeping and maintenance.

Healthcare

Track specific patient and operating rooms for medical emergencies or identify stairwells and closets for employees in danger.

Education

Identify specific classrooms during incidents with students or external threats to expedite emergency workflows.

Retail

Locate the department, aisle or fitting room where an emergency has been declared.
